## HOBBIES AND INTERESTS

---

### Hobbies and interests

Life Sciences: I have always been fascinated by what surrounds me, especially the environment. This curiosity has manifested itself over time with the choice of the course of study (biological - environmental) and through scientific essay readings, with a greater regard to the plant world and related biotechnologies.

Sport: I played competitive volleyball until I was 16. In 2018 the passion took off again and this led me to be the assistant coach and to resume training in the competitive field. After

obtaining the qualification as a Trainee Coach in 2020, I am currently coaching a youth team at the "U.S.D Altair".

Music: always passionate about all kinds of music, I started playing the piano during middle school and I continued to follow lessons even during the first years of high school. I am currently self-taught and I keep this passion.

Theater: I've always been interested in the interpretation and imitation of characters and storytelling. This passion was manifested through amateur theatrical improvisation courses and role-playing games
